## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 31, 2007 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 74-77 are rejected under 35 U.S.C. 102(b) as being anticipated by Galin (US 4,443,441).

Galín teaches the use of the claimed compound, phentolamine as a miotic agent in a pharmaceutical formulation at the claimed concentration. See column 1, lines 42-60 and claim 1. The above reference makes clear that the claimed composition is old and well known.

Applicant's arguments and declaration have been carefully considered, but are not deemed to be persuasive. Applicant in his declaration argues the advantages of the claimed composition over other alpha-adrenergic blockers. However, there is no

evidence of record to demonstrate such advantage. Furthermore, applicant's arguments are drawn to what the claimed composition does and not to what it is. The prior art clearly teaches the use of the claimed compound in a pharmaceutical formulation at the claimed concentrations. Any advantage is considered to be the inherent property of such composition.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 74-77 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 33-36 of copending Application No. 10/799,299. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
